CESSNA TURBOPROPS

# UTILITY AND ADVENTURE WITHOUT BOUNDARIES

---

The year was 1911. Clyde Cessna, armed with an unwavering spirit and a self-built aircraft he called “Silver Wings,” headed to the Great Salt Plains of Alfalfa County, Oklahoma determined to make it fly. Over the course of ten days, Clyde failed to get off the ground. On his thirteenth try, Clyde took to the sky, rising 50 feet and earning the nickname “Birdman of Enid.” Much like Clyde’s steely resolve, today’s Cessna® turboprops are respected for their grit, tenacity and indomitable work ethic.

# WORKHORSES OF THE SKY

CESSNA  
GRAND CARAVAN EX

Three words embody Cessna® turboprops: Reliability. Payload. Performance. These are the aircraft that show up early, roll up their sleeves and get the job done. With flexible cargo configurations and the ability to haul staggering payloads, the world's largest shipping companies have built entire fleets around Cessna® turboprops. Fully capable in rugged terrain, adverse weather and remote areas, these aircraft are renowned for their versatility. Corporate flight departments have a saying for Cessna® turboprops: Load. Fly. Unload. Repeat. And then watch your business take off.

“This aircraft will help us better serve small and medium markets where we aren’t able to operate our larger aircraft.”

**NO RUNWAY,  
NO PROBLEM.**

CESSNA  
GRAND CARAVAN EX  
AMPHIBIAN

Cessna® turboprops are up for any adventure. Built to take off and land in the rigors of the backcountry. Rough, rocky fields. Short, unimproved runways. With the Caravan®, even water. Aircraft designed to go to places where the local fishermen are bears and rush hour is defined by migrating caribou.

Fully customizable for any adventure, from fishing to camping, to simply exploring all the places your mind wanders off to when you're sitting behind your desk. These are the rugged, dependable aircraft that turn weekend getaways into legendary experiences.

“You get to see these really remote areas that are so beautiful without having a big environmental impact.”

# THE POWER TO MOVE PEOPLE

CESSNA  
SKYCOURIER PASSENGER

CESSNA  
CARAVAN AND  
GRAND CARAVAN EX

From the Alaskan tundra to the remote Islands of the Caribbean, to mainstream airports around the world, Cessna® turboprops are proven passenger aircraft that can go wherever you want or need to go. Designed with spacious cabins that can be configured around your needs—for everything from a luxurious VIP sanctuary to a comfortable, hard-working commuter aircraft. The combination of interior flexibility, passenger capacity and payload performance make Cessna® turboprops an obvious choice for your regional flight operations.

“Even with our short airstrip, we can fly a full load of 13 passengers and luggage in and out of the island year-round.”

# UP FOR THE MISSION

It's not in the Cessna® turboprop DNA to shy away from a challenge. So, when government, military and commercial customers need airborne solutions for critical missions, they rely on Cessna® turboprops to make it happen. For everything from air ambulances to float operations, Cessna® turboprops can be delivered mission-ready.

“Very few Caravans live a boring life.”

---

*President of an Arctic airline*

- Providing ample room for medical equipment and a baby elephant, a wildlife conservation, preservation and protection organization in Africa relies on Cessna® turboprop aircraft to rescue elephants, rhinos, lions and other endangered animals orphaned by poachers in Kenya.
- With the ability to transport passengers and heavy payloads, and to land on rugged Arctic terrain in harsh winter conditions, Cessna® turboprops are a lifeline between Alaska's remote villages.
- Whether for military purposes or recreational skydiving, Cessna® Caravan® aircraft are ideal for parachute operations. With a large, unobstructed door and equipped with bench-style seating, they are at-the-ready for the mission.

---

# WE'VE GOT YOUR BACK, AND EVERYTHING ELSE.

Your Cessna® turboprop might take you off the grid, but you're never alone. The Textron Aviation global support network knows no boundaries. Here for you 24/7 with personalized support, technical expertise and the largest parts distribution network in general aviation. You can always trust the knowledge and skill from the people who built your aircraft.
